Construction Alert Temporary Bus Rerouting 69th Street from Penn Avenue to York Avenue

The Metro Council Environmental Services Sewer Interceptor Project along 75th Street required the closure of Penn Avenue at 75th Street. This closure in turn caused the rerouting of the Metro Transit Penn Avenue buses. In order to serve the Penn Avenue transit riders as well as possible, the Penn Avenue bus routes were diverted to 69th Street rather than down the detour route of 66th Street. 69th Street is a City designated collector route which is planned and designed to carry higher traffic volumes. As a collector, 69th Street is wider and built with a stronger pavement design.

The Penn Avenue closure at 75th Street is scheduled for one month. The contractor hopes to be done with the work in Penn Avenue in less than a month. Penn Avenue will be opened and the buses returned to their normal route as soon as the work is completed.

City staff understands that this route change, though temporary, brings noise and disruption to the 69th Street neighborhood. We ask for your patience.

Please call the Metro Sewer Hotline, (612)861-0512 if you have any questions.
