Notice to Property Owners/Residents of 11th Ave

This spring through summer the Met Council will be constructing the new sewer line down 11th Avenue from 72nd St. to 76th St.

This project also involves a new connection for each residence on 11th Avenue in the project area. Recently, some of these residences have had their drain lines replaced from the house into the project area. However the rest of the homes have original piping over 50 years old. It would be of benefit to both the property owners and to the construction project if these older pipes were replaced from the house into the project area prior to the construction project.

Blaylock Plumbing Co will provide a no cost - no obligation video inspection of your sewer line and a cost estimate for replacement if needed.

Thank you,

Dan Blaylock
